

We often talk about using words to make pictures. Now we're really going to do just that! Read the steps carefully and see what happens. Use the space below to follow each step.

1. Look at the word **boy** in the box below.
2. Draw a **rounded** line from the top right line of the **y** to the top of the **b**.
3. Draw another rounded line from the bottom of the **b** to the tail of the **y**.
4. Make a small circle just **below** and between the **b** and the **o**.
5. Make a **half circle** under this small circle.
6. Make a black dot in the center of the **b** and in the center of the **o**.
7. Make a rounded line from the top left line of the **y** to the top of the **b**.
