

Salt Painting

What you will need:

- 1 Canister of salt
- 1 Box of multi-colored chalk
- 3 Paper plates
- 3 Spoons
- 1 clean, dry, glass jar or bottle
- Tools for moving sand around (i.e. toothpick, opened-out paperclip, stick)

What to do:

1. Put $\frac{1}{4}$ - $\frac{1}{2}$ cup of salt in each paper plate.
2. Choose one colored chalk per plate of salt. Rub the chalk on the salt until the salt turns that color. Repeat this step for each plate of salt.
3. Spoon the first layer of colored salt into the jar. Make it as deep as you want. If you don't have enough salt, make more by repeating Steps 1-2. When the salt is as deep as you want, smooth the top.
4. Carefully add the second color of salt on top of the first. When it is as deep you want, smooth the top. Repeat this step for the third color of salt, or add more colors by following Steps 1-4.
5. Slide one of the tools down the side of the jar to move the salt and make waves and designs in the salt.
6. Finish by putting the lid on the jar. You can also put a candle in the center of the salt or a potted plant on top. This makes a great gift or decoration for your home.
